# BACHELOR'S DEGREE IN SCIENCE IN NURSING (RN TO BSN)

## Program Competencies

- Act independently, paying attention to leadership, administration and research, in any health care setting, within the ethical-legal limits and the scope of the practice of the nursing professional in Puerto Rico.
- Develop verbal, non-verbal, written or electronic communication with the client, the family, the community and the multidisciplinary health team to achieve results in the care provided.
- Holistically implement decision-making in the phases of the nursing process to promote, maintain and restore the well-being of the client, the family and the community.
- Integrate innovative advances in technology into research and evidence-based practice to improve client, family, and community care.
- Analyze the types of informatics for the development and administration of nursing care plans to improve the health of the client, the family and the community.
- Evaluate the implications of ethical-legal problems when providing health care with the use of professional ethics canons and the laws that regulate the practice of nursing in Puerto Rico.
- Value individual uniqueness, cultural diversity, and human responses when selecting holistic nursing interventions.
